

THE FUTURE OF SCREEN PRINTING HAS ARRIVED

SPSI Corporate Headquarters
9825 85th Avenue North
Maple Grove, MN 55369

The Next Generation of Water-based Inks

Zodiac™ Aquarius™ waterbased inks have been developed to meet the sustainability demands of the consumer without compromising the performance and durability demands expected by the printer.

PolyOne

Wednesday
JUNE 19
or
Thursday
JUNE 20

Join us for an informative workshop at SPSI's Corporate Office that will help you produce higher quality prints at a more affordable price.

The Aquarius™ line of non-PVC water-based inks provides printers with a comprehensive system of high solids, soft base, discharge, additives and special effects. Jennette Hardy, Senior Business Manager with PolyOne Corporation and Dave Gehrich, SPSI Sales Representative will demonstrate how the Aquarius water-based inks can transform the quality of your prints. This workshop is designed specifically for high-production shops that are always striving to improve their product and maintain a competitive price.

Morning Workshop: 9am-12pm

Afternoon Workshop: 1pm-4pm

Topics covered at both sessions

- Artwork discussion
- Screen Making
- Garment Application
- Specialty Effects

- Discharge Inks
- High Solids
- Recommended supplies and Equipment

- Set up for production printing
- Dryer recommendations and set up
- Live Production printing
- Vendor Question and answers

Limited space available

Please let your SPSI Sales Representative know if you are able to attend and if you plan on staying for lunch.

The Next Generation of Water-based Inks

Zodiac™ Aquarius™ waterbased inks have been developed to meet the sustainability demands of the consumer without compromising the performance and durability demands expected by the printer.

SOFT BASE INK

Zodiac Aquarius™ soft base inks are designed for printing on white or light-colored garments without affecting the fabric hand feel. The ink is ready to use and is formulated to prevent drying on the screen, even on 320-mesh count.

HIGH SOLIDS INK

Zodiac Aquarius™ high solids ink were developed to meet the performance and durability requirements of sport brands. The high solids ink range consists of high opacity white and a soft, flexible base to produce highly opaque, soft hand prints.

DISCHARGE INK

The Zodiac Aquarius™ range of bright discharge inks allow printers to achieve bright whites and colors. They are offered in ZFS (formaldehyde-containing) or NF (non-formaldehyde containing) ranges.

SPECIALTY INK

Ready-to-use waterbased special effects are designed to enhance prints and differentiate designs. This extensive range of products includes Reflective, Pearlescent, Metallics, Brittle and Suede to bring prints to life.

Industry Experts

Jeanette Hardy, Senior Business Manager Water Based Inks - Specialty Inks and Polymer Systems, PolyOne Corporation UK Ltd. Jeanette is the Lead Project Manager for PolyOne Zodiac Aquarius water-based inks with years of experience in screen printing on textiles. She will be conducting demonstrations on setting up and running your production prints.

Dave Gehrich, SPSI Sales Representative

Dave has over 25 years experience in production screen printing and technical sales, as well as a huge advocate of water-based inks produce the prints. Dave will
