sales@actionengineering.com

Ladies, Gentlemen and all friends of Action Engineering - The announcement I've looked forward to for 22 years

At the end of last April , we purchased our own building. During the next 6 months we will be preparing the building and moving to our new home. We anticipate no interruptions to our service.

Our new facility is significantly better than what we have worked with for the last 20 + years. With more than double the space and power infrastructure, we expect to build our company to be ever stronger and able to meet your needs than before. Many new products , a significantly larger inventory, and new machinery have been planned for.

And so - in commemoration of our new building, and the fact we need more business than ever before to renovate and relocate, we are offering special pricing on our latest and hottest new products. I wish to tell you all personally how very grateful we have been for your continued trust in our company.

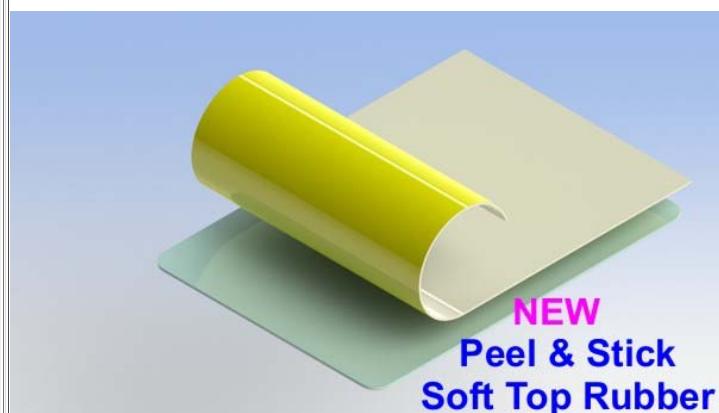

Sincerely,

Erik Naftal
Action Engineering, Inc.

MAJOR Moving Sale - Take 10% off Roller Squeegees, Double Stroke Squeegees, Peel & Stick Soft Top Rubber, and Zipper Hoodie Pallets

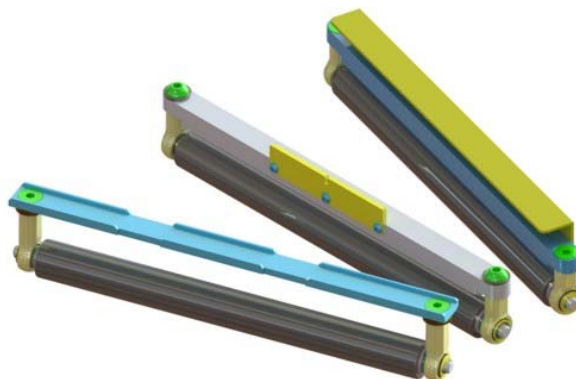

Offer valid for one week only after receipt of this advertisement.

Peel & Stick - Soft Top Rubber Rubber

**NEW
Peel & Stick
Soft Top Rubber**

The New - and very exciting - Roller Squeegee

We are pleased to be able to offer you a new solution for laminating your pallets with soft top rubber. Now available - rubber with pre-applied peel & stick tape. Simply peel the backing liner from the tape and you are ready to laminate the rubber to the pallets.

It eliminates all contact adhesives. It is an 80% time savings and 100% ecologically friendly. There are no fumes, no cleanup, no hazardous materials and it's easy and fast.

Simply peel the yellow liner from the tape and you are ready to stick the rubber to the pallets. It's as easy as 1-2-3!

Best Testimonial of The Month

" I will never, ever, ever, ever, ever, ever, ever, print white plastisol ink without this again - you'll kick yourself after you've tried it for not doing it sooner. "

The Roller Squeegee has a variety of applications which both improve your production rates and the quality of the products that you are producing. Here is a list of the most obvious uses:

- For **Smoothing your Print** after the Flash - with Teflon Film
- Instructions for Smoothing - [Click Here](#)
- Video - [Click here to see video](#)
- Article by Bill Hood - [Click here for article](#)
- **CUSTOMER TESTIMONIALS** - [Click Here](#)

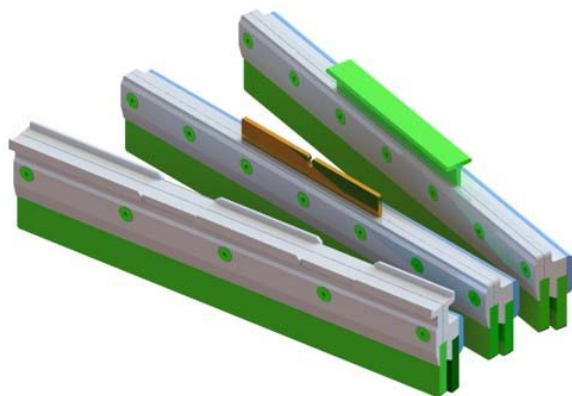

We offer you a **unconditional 100% money back guarantee** if you are not truly satisfied with this exciting new product. Try one today and you will put one on every machine in your shop.

- No Hazardous Materials
- No Gluing Necessary
- No Paint Rollers
- No Prep-Time
- No Cleanup
- No Fumes

Just Say No

Double Stroke Squeegees

Improved Double Stroke Squeegees eliminate the need for having to stroke your screen twice and give you more penetration through the screen and substrate. They increase productivity dramatically on those jobs which presently require that you double stroke your image.

With Water Based Inks and discharge inks the objective is to effect maximum penetration without bleeding through the garment.

- Our Double Stroke Squeegees comes with 70 Duro Rubber installed in the front and 70/90/70 Duro in the rear.
- The effect of using the second squeegee blade behind the first results in an increase of penetration into the fabric.
- Especially useful for pushing plastisol through small mesh openings Most commonly 16" (40cm) but other sizes are available.

Double Stroke Squeegees are available for use on almost all automatic machines.
These special squeegees have a 15 degree angle designed into the assembly.

Zipper Hoodie Pallets

Zipper Hoodie Pallets have been upgraded - This improved geometry allows you to very accurately load your zippered hoodie garment and allow to print all the way up to the shoulder seam and the hoodie/ neck seam. Print like never before.

If you're trying to accomplish an absolutely flawless over the zipper print, then this design is a must. The ZH Pallet has a two-tier slot down the middle. Purpose: To accomplish a continuous print across the zipper and hem assembly of a finished hooded sweatjacket.. aka zipper hoodies. Pallet Size: 4 sizes available, 16 x 22 is the most popular size. **Use a Roller Squeegee with this pallet for the very best results possible. It eliminates buildup.**

- Print Cleanly over zippers.
- Fits all zipper hem assemblies.
- Made of Solid Aluminum & Soft Top Rubber.
- One tier is easement for the zipper hem, and then a deeper easement for the zipper.
