**ORDERS PROCESSED
AND SHIPPED.
IN 3 DAYS**

We offer both wood and aluminum frame remeshing.

You simply send us your old frames and we install new mesh and send them back to your company. Wood frames are sanded on the mesh side of the frame and then new fabric is installed, making the frames like new again.

We only use High Quality 2 part polyurethane glue to restretch frames.

Frames restretched with two part polyurethane adhesive last longer because the adhesive is more chemical resistant. Plus 2 part glues are rubbery not brittle, so no sharp edges.

We also offer 2" Permanent Block (No Tape Screen)

with a bead of chalk on the inside of the frame so no tape is needed.

Then all you have to do is coat, burn, dry and it's ready for the press.

23" X 31" FRAME	
110 MESH	\$13.50
155 MESH	\$13.50
200 MESH	\$14.50
